

Livestock in Europe in a global and European context

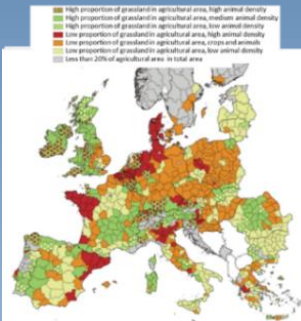

kg CO₂eq/
kg product

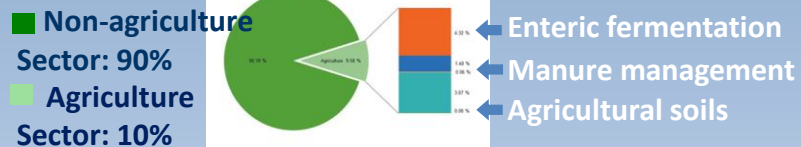

Livestock GHG emission (FAO 2013)

- CH₄ (44%)
- N₂O (29%)
- CO₂ (27%)

EU regional livestock density

EU-28 GHG Emissions

Points of orientation

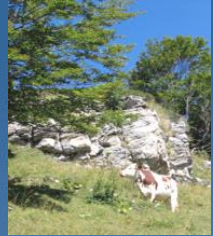

- UN SDG
- COP 21
- IPCC reports on Climate Change
- IPBES report on Biodiversity and Ecosystem Services

Agriculture Knowledge and Innovation Systems

European livestock production

Conventional production
Organic production
Extensive production

Food security
Safe and nutritious food
Positive externalities
